

I strongly support the adoption of RM-10352. 160 has been my main operating band since the 1980's. Back then the "Gentlemens Agreement" was adhered to by most, but now times have changed and now there are those who have the "ME" syndrome rather than an "ALL" syndrome when it comes to operating on this band. I was first licensed in 1959 and have never known a time when bandplans were not in effect on the other bands be it license structured or mode structured. I believe now is time to implement such a plan for this band. Thank you,

Ron McClain W2VO
